

# Containment Simulation Executive Summary — run\_004

| Experiment Metric    | Observed Simulation Value                                               |
|----------------------|-------------------------------------------------------------------------|
| Run ID               | run_004                                                                 |
| Workflow             | workflow_executive_to_research_to_security_to_engineering_to_operations |
| Compromised Agent    | Engineering QA                                                          |
| Runtime $\tau_{FVS}$ | 5                                                                       |
| FVS Size             | 5                                                                       |
| Active Agents        | 18                                                                      |
| Active Edges         | 28                                                                      |
| SCC Count            | 1                                                                       |
| Largest SCC Size     | 18                                                                      |
| Infected Before      | 17                                                                      |
| Infected After       | 0                                                                       |
| Containment Ratio    | 100.0%                                                                  |
| Containment Gain     | 17 agents                                                               |
| Propagation Depth    | 8 -> 0 (Reduction: 8 hops)                                              |
| Graph Hash           | cb7d23ffe897e83a6a4da06b20653e29248ab95f61a252c99332674f339             |
